

The road to a better future for the Aetas. Through a donation of roto-milled asphalt materials by the Manila North Tollways Corporation (MNTC), builder and concessionaire of the 84 kilometer North Luzon Expressway (NLEX), and its operator, Tollways Management Corporation (TMC), more than 300 Aeta families have been given a paved access road and thus bring them into the mainstream of development in Subic and beyond. The asphalt materials will cover more than 300 meters of road in Barangay Pastolan in Hermosa, Bataan. Photo shows MNTC Vice President for Corporate Communications Marlene Ochoa, MNTC Vice President for Operations and Maintenance Assurance Services Raul Ignacio, and TMC Head of Subic Freeport Expressway (SFEX) Charly Española starting to level off the asphalt materials. They are flanked by community volunteers led by Bgy. Captain Conrado Frenilla. Flanking them are Kit Ventura, MNTC senior manager for corporate communication and Barangay Pastolan officials.
